

PROVIDING SURFACE PROTECTION FOR THE CONSTRUCTION INDUSTRY

London 2012 Olympic Park Main Press Centre

Client: Olympic Delivery Authority

Main Contractor : Carillion

Area of Glass Protected: Approx. 6000 m² (Internal & External)

Year: 2010

The Project: In 2010, Protectorglaze Ltd supplied and applied Protectorglaze water based peelable protective coating for glass on the Main Press Centre building at the Olympic Park, Stratford, London for the 2012 games. The protection was applied to the aluminium framed strip glazing and ground floor curtain wall.

The Product: Protectorglaze Temporary Peelable Protection

The most effective glass protection available to the construction industry. A versatile, water resistant, temporary protection that remains intact on the glass for up to 24 months and protects against scratching caused by mortar, plaster, paint, grinder fleck and weld spatter damage.
